Accelerate Clinical Trial Success with WCG + BEKhealth

SMARTER SITE SELECTION.
FASTER PARTICIPANT RECRUITMENT.
PROVEN OUTCOMES.

Clinical trials often stall due to mismatched sites and low recruitment. The WCG–BEKhealth partnership helps eliminate this risk by combining the operational reach of WCG with the speed and accuracy of AI-driven patient matching from BEKhealth. Through this partnership sponsors and CROs gain access to a faster, smarter path to enrollment success.

REALIZE THE VALUE OF PARTNERSHIP

Supporting 92% of FDA-approved therapies in the past five years, WCG brings trusted site relationships, regulatory expertise, and solutions that reduce operational friction.

BEKhealth complements this experience with real-time EMR data review, surfacing trial-qualified participants at 2x the speed and 10x the volume to help sites exceed enrollment goals.

COMBINED SERVICES & TECHNOLOGY

» **Site Network Management:** Develop scalable partnerships with thousands of active research sites.

» **IRB/Ethical Review:** Accelerate regulatory approvals with the industry's leading Institutional Review Board (IRB).

» **Study Start-up Support:** Reduce time to first patient in with feasibility, budgeting, and contracting expertise.

» **Participant Recruitment & Retention:** Boost awareness and enrollment through centralized outreach solutions.

» **Diversity and Inclusion Support:** Meet diversity and inclusion targets through proprietary insights and community engagement.

» **AI Chart Abstraction:** Automate matching of patients to protocols across structured and unstructured EMR data.

» **BEKplatform:** Surface clinically-qualified participants daily for clinical research coordinators (CRCs) and principal investigators (PIs).

» **BEKnetwork:** Access a growing site collaborative of more than 190 engaged research sites with 1.8 billion patient records.

» **Feasibility Analytics:** Predict screen failure, identify enrollment bottlenecks, and optimize study design.

HOW IT WORKS

1

Deploy the Protocol
WCG initiates study start-up and engages qualified sites.

2

Run Patient Feasibility
BEKhealth utilizes AI-driven patient feasibility across 90%+ of the trial criteria.

3

Match Eligible Participants
Matches are identified and sent to CRCs and PIs.

4

Optimize Trial Execution
WCG delivers regulatory, contracting, recruitment, and oversight support to ensure continuous performance and achievement of milestones.

PROVEN RESULTS

187% increase in enrollment in a colon cancer study at a previously non-enrolling site.

90% screen fail reduction on a major depressive disorder trial via real-time participant targeting.

10+ pre-screened participants found in 3 weeks for a highly selective lung cancer trial.

IDEAL FOR SPONSORS & CROs THAT WANT TO:

» Speed study start-up and reduce trial delays.

» Confidently select high-performing sites.

» Maximize participant diversity and protocol fit.

» Rescue stalled trials with data-backed patient matching.

» Eliminate guesswork from feasibility and enrollment.
